

Empath

Easing Patient Transfer

The move from bed to chair is a key moment in a patient's healthcare journey. For clinicians, it's an inherently difficult process due to patient limitations and the number of times these transfers are performed in healthcare environments.

Promoting Safety + Connection

Our research revealed that clinicians' top concerns are keeping patients comfortable and safe while promoting overall quality of care. Empath is designed to meet these needs and help empower patients, which can lead to enhancing the wellbeing, empathy and connection of clinicians and patients alike.

Suited for Many Spaces

The Empath recliner offers the quality, versatility, safety, and variety of features needed for the evolving needs of healthcare environments. With both essential and advanced features, it adapts to a wide range of uses in clinical spaces.

Empath

Features:

- Developed entirely from real-world insights to reduce stress and potential for injury for both patients and caregivers
- Recline activation paddles are easy to reach and use whether upright or fully reclined
- Infinite back stop positions from upright to fully reclined
- Backrest and footrest operate independently
- Footrest scallop protects where feet touch most and helps facilitate safe and easy exiting
- Bumpers offer a refined aesthetic while protecting the bottom of the recliner
- Complete welded steel construction

Empath

Available with:

- Central lock caster system with easy to activate pedals at the front and on both sides of the chair
- Molded urethane upper arms with integrated hand grips for safe and easy entry and exit
- Fully upholstered arms for a residential aesthetic with optional highly cleanable plastic arm caps
- Dual flip-down arms for safe & easy patient transfer
- Trendelenburg mechanism
- Adjustable headrest in two styles
- Seat width of 23" or 26"
- Tablet arm
- Push bar to assist in maneuverability
- Directional steering to help the chair track straight
- Pull out footrest to support feet when seated
- IV pole and holder
- Drainage bag hanger
- Heat and massage
- Dual backrest recline paddles (upholstered arms option only)

ADJUSTABLE HEADREST

Moves up and down, or can flip over the top when not in use. Attached with zipper for easy removal.

HEAT AND MASSAGE

With three settings for each function, patients benefit from comfort and control.

DUAL FLIP-DOWN ARMS

Provide barrier-free patient transfers from either side of the chair.

TRENDELENBURG (DUAL-SIDED)

Foot-activated by the clinician from either side, it raises patient's feet above the head.

FOOTREST CONTROL LEVER

Opens and closes the footrest separately from reclining motion for maximum control. **S**

S = standard feature

PASS-THROUGH DESIGN

Avoids trapping liquids and debris for easier cleanup. **S**

TABLET ARM

Provides access to personal items and an increased sense of control and comfort.

MOLDED ARMS

Provide a natural grip and offer patients both stability and comfort. **S**

BACK RECLINE PADDLE (DUAL-SIDED)

Long ergonomic shape is easy for patients to reach, whether upright or reclined. **S**

PULL-OUT FOOTREST

Slides out easily to support patient's feet when seated.

FOOTREST SCALLOP

Provides comfort and durability and helps facilitate exiting the chair. **S**

PUSH BAR

Ergonomically shaped for easy grip and chair maneuverability.

IV POLE AND HOLDER

Height adjustable, the 3/4" stainless steel pole fits into the holder located at the back of the arm panel, saving valuable floor space. The holder also accommodates 1/2" IV poles for added flexibility.

DIRECTIONAL STEERING

Helps the chair track straight while in motion, improving control in hallways and around corners.

BUMPERS

Offer a refined aesthetic while protecting the bottom of the recliner. **S**

CASTERS

Four-inch non-marring casters glide silently for smooth operation. **S**

DRAINAGE BAG HANGER

Accommodates a wide variety of drainage bags and lays flat when not in use.

CENTRAL LOCK (DUAL-SIDED)

Pedals can be easily activated from either side of the chair. **S**
